0.0 PLANNING REPORT FOR PLAN CHANGE 91 - RANGIURU BUSINESS PARK - WATER SUPPLY OPTION

File Number: A3735968

Author: Phillip Martelli, Resource Management Manager

Authoriser: Rachael Davie, Group Manager Policy Planning And Regulatory Services

RECOMMENDATION

1. That the report titled "Planning Report for Plan Change 91 - Rangiuru Business Park - Water Supply Options" dated 4 May 2020 be received.

- 2. That pursuant to Clause 10(1) of Schedule 1 of the Resource Management Act 1991, the District Plan Committee makes the following decisions on Plan Change 91 ...decisions to be inserted here.
- 3. That staff be authorised to make minor editorial changes to the decision of the District Plan Committee in consultation with the Committee Chairperson.
- 4. That pursuant to Clause 10(4)(b) of Schedule 1 of the Resource Management Act 1991, the decision on Plan Change 91 be publicly notified.
- 5. That pursuant to Clause 11 of Schedule 1 of the Resource Management Act 1991, the decision on Plan Change 91 be served on every person who made a submission on the Plan Change and be made available at all Council offices and all public libraries in the District.

INTRODUCTION

The purpose of this report is to provide recommendations on submissions and further submissions to Plan Change 91 - Rangiuru Business Park – Water Supply Options.

The current provisions in the District Plan provide for two alternatives for water supply to Rangiuru Business Park. The purpose of the plan change is to provide for an additional third option.

For a full background to the Plan Change and explanation of the proposed provisions, please refer to the Section 32 Report (Attachment 2).

Any recommended changes (by the author of this report) to the District Plan First Review are shown as follows; existing District Plan text in black, proposed changes as included in the Section 32 Report in red, and recommendations as a result of this Planning Report in blue.

BACKGROUND TO PROPOSED PLAN CHANGE 91

The Structure Plan and Infrastructure Schedule in the District Plan provides for two water supply options for the Rangiuru Business Park. These are the Eastern Water Supply Network (new Rangiuru Road reservoir) (named Option A), or via an on-site bore and treatment plant (named Option B).

This plan change proposes a third option (to be named Option C), being a water supply from a second bore at Pongakawa. The reason for the third option is that it is more cost-effective than the other two options, and it has a resource consent from the Regional Council.

The District Plan is quite specific about the infrastructure to be used for the Rangiuru Business Park. This is to ensure that the expenditure on up-front infrastructure by the initial developer is recouped through financial contributions by later developments.

SUBMISSIONS AND FURTHER SUBMISSIONS

One submission point was in support of the Plan Change, while seven submission and further submission points were in support subject to amendments, and one submission point was neutral. There was one submission point in opposition. Nine submission points and one further submission point were received.

The main submission points are as follows:

- 1. General support because of the need to get the Business Park operating.
- 2. With the current Regional Consent expiring in 2025, the bore is seen as a short term solution. Associated with this is concern about the long term impact on water supply for the horticultural and agricultural needs of the Pongakawa area.
- 3. Need for co-ordination with NZTA regarding installation of pipes in the State Highway road reserve.
- 4. Potential pipeline construction impact on archaeological sites.
- 5. Clarification is sought on whether the subject bore has the same aquifer source as the other Pongakawa bore.
- 6. Any surplus capacity be considered for municipal supply to service possible future urban expansion of Paengaroa.
- 7. Minor amendment to wording to refer to three options, not two, and to clarify which options require Regional Council consent.

Option 1 – As Proposed - Addition of a third water supply option for Rangiuru Business Park to be named Option C (Pongakawa bore)

Utilise Pongakawa bore ESZ10 and associated infrastructure to provide water to Rangiuru Business Park. Minor edits are also required to the rules to show that there are now three options and that all of these options require a resource consent from the Bay of Plenty Regional Council.

Costs	•	The route predominantly follows existing roads. There is one site that is identified on the Archaeological Association database that may be affected. There is the potential for other archaeological or cultural finds to be made in these locations. In such cases the provisions for accidental finds will need to be followed with Heritage New Zealand, which will also require consultation with tangata whenua.
	•	All costs will be borne by the developer.
Benefits	•	Utilises an existing consented bore that has capacity to provide water for Rangiuru Business Park.
	•	Provides a more cost effective water supply option than other options listed in the District Plan.
	•	Construction will occur primarily within modified land and the road reserve.
	•	Enables earlier operation of Rangiuru Business Park than would be possible under other water supply options, including business and employment options.

	Will avoid a delay to the development of the Rangiuru Business Park.
Effectiveness	Effective in that water supply is provided to Rangiuru Business Park, via an existing consented take.
Efficiency	Water supply can be provided to Rangiuru Business Park in the most cost efficient way.
Risks of Acting/ Not Acting if there is uncertain or insufficient information about the subject matter	 Additional archaeological investigation will likely be required, including an authority from Heritage New Zealand. Additional negotiations will be required to construct the main through SH 2, Te Puke Golf Course, railway and Maketu Road.

Option 2 - Status Quo

The District Plan retains the requirement for water supply servicing of Rangiuru Business Park being dependent on one of two options, being either via the Eastern Water Supply Network (new Rangiuru Road reservoir) (named Option A), or via an on-site bore and treatment plant (named Option B).

Costs	 Development of Rangiuru Business Park will be delayed, as the on-site water bore and reticulation, and Rangiuru reservoir options are more expensive, and less attractive to developers. Delayed operation of the Business Park, with delayed potential for new business and job creation.
Benefits	No particular benefits.
Effectiveness	Not effective as it delays the development of the Rangiuru Business Park.
Efficiency	Not efficient as current water source options are more expensive.
Risks of Acting/ Not Acting if there is uncertain or insufficient information about the subject matter	Sufficient information is available.

DISCUSSION ON SUBMISSIONS AND FURTHER SUBMISSIONS

1. The cost of providing all of the required water supply infrastructure is cheaper with the bore option than the other options already provided for in the District Plan, plus the bore already has consent from the Regional Council, thus saving considerable time and expense. The Plan Change is necessary to enable the bore option to be included in the Financial Contributions Schedule, and thus allow the developer of the Business Park to recoup costs.

- 2. The changes to Rule 12.4.13.3 Water Supply General are required to ensure clarity and certainty.
- 3. There is concern about possible effects on the rural community, particularly with regard to the future ability to obtain water for orchard conversions. This is related to the possibility that the bore will not be re-consented in 2025 and the Rangiuru Business Park will look to other aquifers for its supply, thus restricting agricultural users. There are two bores at Pongakawa that draw water from separate aquifers. This Plan Change is for only one of those bores. Indications from the Regional Council (pers.comm.are) that there should not be any capacity issues with the aquifer and hence re-consenting. Notwithstanding, this is the developers risk and not a District Plan matter.
- 4. Concerns raised about the need for co-ordination with NZTA regarding installation of pipes in the State Highway road reserve, and from NZKGI regarding potential impact on archaeological sites from pipeline construction, are standard operating procedures and are covered by separate legislation.
- 5. Submitter 23 requested that any surplus capacity be considered for municipal supply to service the expansion of Paengaroa. Firstly, use of this bore will not be an option because the Rangiuru Business Park will need all the bore's capacity. Secondly, the possible urban expansion of Paengaroa is subject to a separate process being undertaken by SmartGrowth, and such a decision is still some time away.

RECOMMENDATION

That the Plan Change be adopted as notified subject to the following amendments:

12.4.13.3 Water Supply – General

- (a) Water supply servicing in the Rangiuru Business Park is possible via two three distinct options as follows:
- (b) Both The three options are viable options. All options A and B will require resource consent from the Regional Council.

The following submissions are therefore:

Accepted

Submission	Point Number	Name
23	1	Pine Valley Orchard Ltd

Accepted in Part

Submission	Point Number	Name
11	5	Te Puke Economic Development Group
FS34	12	Federated Farmers of NZ
20	7	NZ Transport Agency
21	12	NZ Kiwifruit Growers
23	2	Pine Valley Orchard Ltd

17	8	BOP Regional Council
1	35	Kinnoch, Daniel
17	9	BOP Regional Council

Rejected

Submission	Point Number	Name
19	8	Federated Farmers of NZ

REASONS

- 1. The use of a third option for water supply (a second bore at Pongakawa) is a cost-effective solution to help establishing the Rangiuru Business Park.
- 2. The inclusion of the second bore in the Financial Contributions Schedule will allow the developer of the Rangiuru Business Park to recoup costs.
- 3. The use of the second bore will not affect the ability of future users of water in the eastern part of the District to apply for water from other sources.
- 4. The minor change to wording is to provide certainty and clarification with regard to there now being three options and these all requiring resource consent from the Bay of Plenty Regional Council. There will be no surplus capacity for municipal supply to service the expansion of Paengaroa. The possible urban expansion of Paengaroa is subject to a separate process being undertaken by SmartGrowth and such a decision is still some time away.
- 5. Concerns raised about the need for co-ordination with NZTA regarding installation of pipes in the State Highway road reserve, and from NZKGI regarding potential impact on archaeological sites from pipeline construction, are standard operating procedures and are covered by separate legislation.

PLAN CHANGE 91 - RECOMMENDED CHANGES TO THE DISTRICT PLAN FIRST REVIEW

The purpose of this part of the report is to show the Proposed Plan Change in full including any recommended changes in response to the submissions and further submissions.

Recommended changes to the District Plan First Review are shown as follows; existing District Plan text in black, proposed changes as included in the Section 32 Report in red, and recommendations as a result of this Planning Report in blue.

Amend Section 12 – Subdivision and Development as follows:

12.4.13.3 Water Supply – General

- (a) Water supply servicing in the Rangiuru Business Park is possible via two three distinct options as follows:
- (i) Option A Eastern Water Supply Network, which constitutes:
 - New reservoir at Rangiuru Road (5,500m³);
 - Gravity supply main from Rangiuru Road reservoir to Business Park (450mm diameter, approximately 7.8km length);

- Rising main from existing Eastern Supply water source to new reservoir at Rangiuru Road (225mm diameter, approximately 9.0km length);
- Temporary pump station, Stage 1;
- Pah Road/Young Road/ State Highway 2 reticulation loop (375mm diameter, approximately 5.3km length);
- Internal Park trunk reticulation.

(ii) Option B – On site water bore and treatment plant, which constitutes:

- On site water bores;
- Treatment plant;
- On site reservoirs;
- Associated and ancillary equipment;
- Internal Park trunk reticulation as shown on the structure plan.

(iii) Option C – Pongakawa bore, which constitutes:

- New pump(s) and controls for bore ESZ10 at Pongakawa;
- <u>Upgrade of the water treatment plant (WTP) at Pongakawa and new pump(s) and</u> controls; and
- New trunk mains (315 mm OD diameter, approximately 9.2 km length) from ESZ10 to the WTP and then from the WTP to proposed Rangiuru Business Park reservoirs.
- On-site reservoirs and associated ancillary equipment.
- Internal Park trunk reticulation as shown on the structure plan.
- (b) Both The three_options are viable options. Options A and B will All options require resource consent from the Regional Council. Selection of the option to serve the Business Park to be determined by the developer of the first land use or subdivision within Stage 1 who must provide sufficient capacity for 50% of the land in Stage 1.
- (c) Once a preferred option is chosen this is the option to serve the entire Business Park. A combination of options is not permissible unless demonstrated as being more cost effective.

Add to Appendix 7 - Structure Plans (7.11 Rangiuru Business Park) a financial contributions schedule and map as shown in Attachment 1.

Change to the District Plan - First Review

Plan Change 91 Rangiuru Business Park - Water Supply Option

Section 32 Report

1.0 Introduction

1.1. General Introduction and Background

The Rangiuru Business Park is an area of land (250 ha) zoned for future long term industrial use beyond 2021, as included in the Western Bay of Plenty District Plan, which was made operative on 16 June 2012.

Currently, under the District Plan water supply servicing for Rangiuru Business Park is dependent on one of two options, being either via the Eastern Water Supply Network (new Rangiuru Road reservoir), or via an onsite bore and treatment plant.

This plan change proposes a third option, being water supply from a second bore at Pongakawa.

2.0 Resource Management Act 1991

2.1. Section 32 – Requirements for Preparing Evaluation Reports

Before a proposed plan change can be publicly notified the Council is required under section 32 ("s.32") of the Resource Management Act 1991 ('the Act' or 'RMA') to carry out an evaluation of alternatives, costs and benefits of the proposal. With regard to the Council's assessment of the proposed plan change s.32 requires the following:

- (1) An evaluation report required under this Act must—
 - (a) examine the extent to which the objectives of the proposal being evaluated are the most appropriate way to achieve the purpose of this Act; and
 - (b) examine whether the provisions in the proposal are the most appropriate way to achieve the objectives by—
 - (i) identifying other reasonably practicable options for achieving the objectives; and
 - (ii) assessing the efficiency and effectiveness of the provisions in achieving the objectives; and
 - (iii) summarising the reasons for deciding on the provisions; and
 - (c) contain a level of detail that corresponds to the scale and significance of the environmental, economic, social, and cultural effects that are anticipated from the implementation of the proposal.
- (2) An assessment under subsection (1)(b)(ii) must—
 - (a) identify and assess the benefits and costs of the environmental, economic, social, and cultural effects that are anticipated from the implementation of the provisions, including the opportunities for—
 - (i) economic growth that are anticipated to be provided or reduced; and
 - (ii) employment that are anticipated to be provided or reduced; and
 - (b) if practicable, quantify the benefits and costs referred to in paragraph (a); and
 - (c) assess the risk of acting or not acting if there is uncertain or insufficient information about the subject matter of the provisions.

Change to the District Plan – First Review 10 July 2019 Page 2 of 8 Plan Change 91 Section 32 Report – Rangiuru Business Park Doc No: A35210303521030

- (3) If the proposal (an amending proposal) will amend a standard, statement, regulation, plan, or change that is already proposed or that already exists (an existing proposal), the examination under subsection (1)(b) must relate to—
 - (a) the provisions and objectives of the amending proposal; and
 - (b) the objectives of the existing proposal to the extent that those objectives—
 - (i) are relevant to the objectives of the amending proposal; and
 - (ii) would remain if the amending proposal were to take effect.
- (4) If the proposal will impose a greater prohibition or restriction on an activity to which a national environmental standard applies than the existing prohibitions or restrictions in that standard, the evaluation report must examine whether the prohibition or restriction is justified in the circumstances of each region or district in which the prohibition or restriction would have effect.
- (4A) If the proposal is a proposed policy statement, plan, or change prepared in accordance with any of the processes provided for in Schedule 1, the evaluation report must—
 - (a) summarise all advice concerning the proposal received from iwi authorities under the relevant provisions of Schedule 1; and
 - (b) summarise the response to the advice, including any provisions of the proposal that are intended to give effect to the advice.

2.2. Section 74 – Iwi Management Plans

In accordance with Section 74(2A) of the Act, Council must take into account any relevant planning document recognised by an iwi authority lodged with Council. The following iwi have interests in the Rangiuru and Pongakawa areas:

- Ngāti Pikiao
- Tapuika
- Ngāti Whakaue
- Ngāti Mākino
- Ngāti Rangiwewehi
- Ngāti Rangitihi
- Ngāti Pūkenga
- Ngāi Te Rangi

Subsequently, the following iwi planning documents are deemed relevant:

- Ngāti Pikiao Iwi Resource Management Stategy Plan 1993
- Tapuika Environmental Management Plan 2014
- Ngāti Whakaue ki Maketu Hapū Iwi Resource Management Plan 2009
- Ngāti Rangiwewehi Iwi Environmental Management Plan 2012
- Ngāti Rangitihi Iwi Environmental Plan 2011
- Ngāti Pūkenga Resource Management Plan 1993
- Ngāi Te Rangi Iwi Resource Management Plan 1995

Change to the District Plan – First Review 10 July 2019 Page 3 of 8 Plan Change 91 Section 32 Report – Rangiuru Business Park Doc No: A35210303521030

None of the iwi/hapū management plans lodged with Council raise any issues of particular relevance to this plan change. In particular, the District Plan already provides for water supply to Rangiuru Business Park from within the Eastern Water Supply Network. The Pongakawa bore is located within the Eastern Water Supply Network. However, it is noted that groundwater allocation is a common issue amongst iwi/hapū management plans.

The Pongakawa bore (ESZ10) is also consented as Consent 62957. This consent expires on 31 August 2025 and is attached as Appendix 1.

2.3. Clause 3 of Schedule 1 - Consultation

Clause 3(1) of Schedule 1 of the RMA requires the Council to consult the following during the preparation of a proposed plan:

- a. The Minister for the Environment;
- b. Other Ministers of the Crown who may be affected;
- c. Local authorities who may be affected;
- d. Tangata Whenua of the area who may be affected (through iwi authorities); and
- e. Any customary marine title group in the area.

None of the preceding parties have been consulted with during the preparation of this plan change, given that the additional water supply option is from within the Eastern Water Supply Network.

No other consultation has been completed, although we note that the Pongakawa bore has an existing resource consent.

3.0 Issue 1 – Water supply to Rangiuru Business Park

The Rangiuru Business Park has the option of obtaining water supply from the second bore at Pongakawa, being within the Eastern Water Supply Network. This will require an amendment to section 12.4.13.3 of the District Plan, as well as an additional financial schedule and a schematic structure plan.

The Rangiuru Business Park requires access to water to commence development. However, the Pongakawa bore option cannot be utilised unless it is added to the District Plan. The Pongakawa bore option includes:

- New pump(s) and controls for bore ESZ10 at Pongakawa;
- Upgrade of the water treatment plant (WTP) at Pongakawa and new pump(s) and controls;
- New trunk mains from ESZ10 to the WTP and then from the WTP to Rangiuru Business Park;
- On site reservoirs and associated ancillary equipment; and
- Internal Park Trunk Reticulation.

Change to the District Plan – First Review 10 July 2019 Page 4 of 8 Plan Change 91 Section 32 Report – Rangiuru Business Park Doc No: A35210303521030

The District Plan contains the following rule:

12.4.13.3 Water Supply – General

- (a) Water supply servicing in the Rangiuru Business Park is possible via two distinct options as follows:
 - (i) Option A Eastern Water Supply Network, which constitutes;
 - New reservoir at Rangiuru Road (5,500m³);
 - Gravity supply main from Rangiuru Road reservoir to Business Park (450mm diameter, approximately 7.8km length);
 - Rising main from existing Eastern Supply water source to new reservoir at Rangiuru Road (225mm diameter, approximately 9.0km length);
 - Temporary pump station, Stage 1;
 - Pah Road/Young Road/ State Highway 2 reticulation loop (375mm diameter, approximately 5.3km length);
 - Internal Park trunk reticulation.
 - (ii) Option B On site water bore and treatment plant, which constitutes:
 - On site water bores;
 - Treatment plant;
 - On site reservoirs;
 - Associated and ancillary equipment;
 - Internal Park trunk reticulation as shown on the structure plan.
- (b) Both options are viable options. Option B will require resource consent from the Regional Council. Selection of the option to serve the Business Park to be determined by the developer of the first land use or subdivision within Stage 1 who must provide sufficient capacity for 50% of the land in Stage 1.
- (c) Once a preferred option is chosen this is the option to serve the entire Business Park. A combination of options is not permissible unless demonstrated as being more cost effective.

It is up to the developer as to whether Option A or B is taken. This is a decision that will be made by the developer of the first land use or subdivision within Stage 1, and who must provide sufficient capacity for 50% of the land in Stage 1. Under part (c) of this rule, whichever option that is chosen will serve the entire business park. A combination of options is not permissible, unless this is shown to be more cost effective.

Option A provides for water supply from the Eastern Water Supply Network, via a new reservoir at Rangiuru Road. However, costings have been completed to use the Pongakawa bore (ESZ10). Consent 62957 for this bore provides for a take of 4,320 m³/day or 50 L/sec and expires on 31 August 2025. These costings are provided in an updated Financial Schedule appended as Appendix 2 to this report.

Change to the District Plan – First Review 10 July 2019 Page 5 of 8 Plan Change 91 Section 32 Report – Rangiuru Business Park Doc No: A35210303521030

Such a change to provide for the Pongakawa bore in Rule 12.4.13.3 would appear as stated below in section 4.0 of this report.

3.1. Option 1 – Status Quo

The District Plan retains the requirement for water supply servicing of Rangiuru Business Park being dependent on one of two options, being either via the Eastern Water Supply Network (new Rangiuru Road reservoir), or via an on-site bore and treatment plant.

Costs	 Development of Rangiuru Business Park will be delayed, as the on-site water bore and reticulation, and Rangiuru reservoir options and more expensive, and less attractive to developers. Delayed operation of the business park, with delayed potential for new business and job creation.
Benefits	• Existing water supply options have already been forecasted in the District Plan.
Effectiveness/ Efficiency	 Effective in that water supply is provided to the business park. Not an efficient use of capital to build infrastructure – Options A and B are more expensive.
Risks of Acting/ Not Acting if there is uncertain or insufficient information about the subject matter	No regional consents are in place for either Option A or B.

3.2. Option 2 – Addition of Option C (Pongakawa bore)

Utilise Pongakawa bore ESZ10 (see Map in Appendix 3) and associated infrastructure to provide water to Rangiuru Business Park.

Costs	• The route traverses two areas of potential archaeological interest. These areas are within the road reserve and Te Puke Golf Course. There is the potential for archaeological or cultural finds to be made in these locations.
Benefits	 Utilises an existing consented bore that has capacity to provide water for Rangiuru Business Park. Provides a more cost effective water supply option than other options listed in the District Plan. Construction will occur primarily within modified land and the road reserve. Enables earlier operation of Rangiuru Business Park than would be possible under other water supply options, including business and employment options.
Effectiveness/	Effective in that water supply is provided to Rangiuru
Efficiency	Business Park, via an existing consented take.
	 Water supply can be provided to Rangiuru Business Park in the most cost efficient way.

Change to the District Plan – First Review 10 July 2019 Page 6 of 8

Plan Change 91

Section 32 Report – Rangiuru Business Park Doc No: A35210303521030

Risks of Acting/ **Not Acting if** there is uncertain or insufficient information about the subject matter

- Additional archaeological investigation will likely be required, including an authority from Heritage New Zealand.
- Additional negotiations will be required to construct the main through SH 2, Te Puke Golf Course, railway and Maketu Road.

3.3. **Preferred Option**

The preferred option is Option 2.

3.4. Reasons

Use of the Pongakawa bore and associated infrastructure enables water supply to be provided to Rangiuru Business Park in a cost effective manner compared to other options. This enables operation of the business park to occur sooner and as a consequence attract new business and employment opportunities. The Pongakawa bore has an existing regional consent. Neither of the Rangiuru or on site water supply options have regional consents in place.

Additional archaeological investigations will be required. Negotiations will be required to enable access for construction of the pipeline. However, these are considered to be low risk matters to address. In any case, the use of the other existing water supply options remain available in the District Plan.

4.0 Recommended Changes to the District Plan

12.4.13.3 Water Supply - General

- Water supply servicing in the Rangiuru Business Park is possible via (a) two distinct options as follows:
 - (i) Option A Eastern Water Supply Network, which constitutes:
 - New reservoir at Rangiuru Road (5,500m³);
 - Gravity supply main from Rangiuru Road reservoir to Business Park (450mm diameter, approximately 7.8km length);
 - Rising main from existing Eastern Supply water source to new reservoir at Rangiuru Road (225mm diameter, approximately 9.0km length);
 - Temporary pump station, Stage 1;
 - Pah Road/Young Road/ State Highway 2 reticulation loop (375mm diameter, approximately 5.3km length);
 - Internal Park trunk reticulation.
 - (ii) Option B On site water bore and treatment plant, which constitutes:
 - On site water bores;
 - Treatment plant;

Page 7 of 8 Plan Change 91 Section 32 Report – Rangiuru Business Park Doc No: A35210303521030

- On site reservoirs;
- Associated and ancillary equipment;
- Internal Park trunk reticulation as shown on the structure plan.

(iii) Option C – Pongakawa bore, which constitutes:

- New pump(s) and controls for bore ESZ10 at Pongakawa;
- Upgrade of the water treatment plant (WTP) at Pongakawa and new pump(s) and controls; and
- New trunk mains (315 mm OD diameter, approximately 9.2 km length) from ESZ10 to the WTP and then from the WTP to proposed Rangiuru Business Park reservoirs.
- On-site reservoirs and associated ancillary equipment.
- Internal Park trunk reticulation as shown on the structure plan.
- (b) Both The three options are viable options. Options A and B will require resource consent from the Regional Council. Selection of the option to serve the Business Park to be determined by the developer of the first land use or subdivision within Stage 1 who must provide sufficient capacity for 50% of the land in Stage 1.
- (c) Once a preferred option is chosen this is the option to serve the entire Business Park. A combination of options is not permissible unless demonstrated as being more cost effective.
